1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by
Dass et. al. (6,162,652).

Dass et. al. disclose a process for forming a bonding pad on the surface of a wafer, which is comprised of the following steps:

-An Al bond pad (110) is formed onto the surface of an insulating pad on the surface of the wafer (100).;

-A Si₃N₄ passivation layer (115) is formed onto the surface of the Al bond pad.;

-A polyimide insulating film (120) is formed onto the surface of the Si₃N₄ layer.;

-A contact hole is formed through the Si₃N₄ layer, and the polyimide layer down to the Al bond pad.;

-A Ti adhesion layer (130) is conformably formed onto the surface of the wafer.

The Ti layer is approximately 500 angstroms thick (i.e.-1000 angstroms thick).;

and

-A Ni-V layer (135) is conformably formed onto the surface of the Ti layer.

This is discussed specifically in columns 5-6; and discussed in general in columns 1-10. This is shown in figures 1-18.

Art Unit: 1763

3. Claims 4-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

-The wording used in paragraph 5 of claim 4 is written in a very confusing manner, and should be reworded.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication should be directed to examiner

George A. Goudreau at telephone number (571)-272-1434.
